Consulting Services for Oracle E-Business Suite.

Solution IT, Inc.

Solution IT, Inc. is an Oracle Partner and leading provider of Oracle E-Business suite consulting services. Our highly skilled team of practice leaders, project managers, subject matter experts and consultants have extensive product, industry and hands-on experience. Solution IT utilizes a proven methodology and customized solutions to work cohesively and efficiently.

We deliver high quality, cost-effective Oracle solutions including: Implementations, customizations/enhancements, integration, application maintenance/support and upgrade services.

Our Services.

Through our flexible engagement model, Solution IT allows you to choose how you engage with our team. This customized approach to consulting services puts you in control with the power to dictate your level of our involvement.

By working with our clients—and within our client’s organizational structure—we can recommend an approach that best meets our client’s timeline and budget.

Our Knowledge. Our Approach.

The Solution IT team has significant experience working with the Oracle E-Business suite platform and adapting those solutions to meet specific business needs. Through our deep understanding of enterprise level business operations and our unique implementation model, we have the ability to adapt quickly to changing business requirements and determine the optimal solution.

Your Investment. Our Solutions.

In today’s competitive marketplace ROI is essential. Solution IT can help leverage your Oracle system to better meet your business needs, reduce the need for custom applications and lower your total cost of ownership.

Our Experience. Your Success.

When it comes to Oracle service and support you simply can’t afford inexperienced consultants. Our team brings the experience of multiple implementations across various industries, helping us reduce the need for customizations, shortening the implementation timeline and cutting costs.
