

**Local Solution. Global Reach.**

**BUILD THE PERFECT TEAM**

**BUILD THE PERFECT TEAM**

## SOLUTION IT

Solution IT is a national IT consulting company specializing in: Technology Staffing and Oracle E-Business Solutions. We collaboratively work with our clients to determine a logical and cost-effective roadmap for their staffing and project needs. We pride ourselves on the resources we deploy for our clients.

## FOR TODAY'S MARKETPLACE

In today's rapidly evolving business environment, many of our clients tell us the difficulties they have in locating and attracting talent. They tell us that they are trying to maximize their budgets with both flexible and scalable solutions. They are also experiencing increasing business demands for IT solutions. Does any of this sound familiar?

At Solution IT, we not only seek the best talent locally, but have the ability to bring the hard to find talent to the local market through our national recruiting model. We proactively support our clients by continuously recruiting their commonly used skills. We are experts in providing a wide range of IT resources to support our clients' needs (back fill, project talent scalability, and unique technology expertise). We are committed to delivering efficient and cost-effective solutions that enhance customer productivity and profitability.

# VMS / MSP Experts

Low Cost Delivery Model

## Oracle ERP - EBS/Cloud

### PROJECT, STAFFING & SUPPORT

- Implementation
- Rollouts
- New Functionality
- Upgrades

# 2 Weeks

Time needed to deploy a global team of 35 consultants, delivering results quickly.

## Local Support. Global Reach.

Some projects require an on-site solution — skilled experts working with your IT staff and end-users. Often though, the most cost-effective approach is a blended team of on-site and remote resources. That's Solution IT's global advantage.

## WHAT WE DO

### People

We translate your requirements into the right people for your technology needs. We identify the hundreds of candidates, qualify the many, interview the select, attract the right few, present you the best two, for you to determine the right one (back fill, project talent scalability, and unique technology expertise).

### Consulting

Solution IT has experienced Project Managers & BA's with both Waterfall or Agile methodologies to seamlessly deliver for your project. Within Oracle EBS, we can take ownership of a full project or be part of your team to bring the skill and experience needed to deliver an on time and under budget project.

### Managed Services (On-Site / Off-Site / Offshore)

Solution IT uses a blended delivery model to provide the right mix of In-house (onsite), Client Site (offsite) and offshore-India that meets your specific requirements. With a sound methodology and an experienced pool of senior Technical and Functional Oracle E-Business suite consultants, we deliver high quality, cost-effective Oracle Solutions and services.
